Paying for it	3
Questions people ask	4
Where to find us	4

You have booked your free 15-minute video assessment. This guide sets out what happens from here, the five procedures we offer and what each one costs.

01 What happens next

1

FREE ONLINE ASSESSMENT, 15 MINUTES — Free

A video call with your laser surgery coordinator

One of our laser surgery coordinators joins you on a video call, asks about your eyes and what you want from them, and tells you honestly whether you are likely to be suitable. They can also take you through the prices in this guide.

We will send the video call link by SMS and email before your appointment.

2

IN CLINIC, BUDERIM — $100 deposit

Your in-person assessment at Buderim

A $100 deposit, which comes off your laser surgery fee, books your in-person assessment at our Buderim clinic. Our qualified laser vision optometrist runs extensive diagnostic eye tests to match the procedure to you, and you get to experience what your vision could look like afterwards.

3

WHEN YOU DECIDE TO GO AHEAD — $2,000 surgery deposit

Your pre-surgery consultation and surgery

A $2,000 surgery deposit books your surgery date, and you then meet Dr Sonia Moorthy for your pre-surgery consultation, where she talks you through the procedure and answers every question. The balance is normally due one week before surgery, and we confirm your total price when you book.

✓ You decide in your own time. Nothing is booked without you.

02 The five procedures

You do not have to work out which one you need. Here is what each one is, in plain words, with its price for both eyes.

PROCEDURE	WHAT IT IS, AND WHO IT IS OFTEN CONSIDERED FOR	PRICE
SMILE PRO® ZEISS VisuMax 800 Flap-free keyhole laser	Keyhole laser correction for short-sightedness and astigmatism. A small incision and no corneal flap. **Often considered** for active, short-sighted eyes, and by people who surf, swim or play sport.	**$7,800** **both eyes** Includes surgeon and laser suite fees
LASIK ZEISS VisuMax 800 and MEL 90	The well-established laser procedure, performed with two ZEISS lasers: one creates a thin, blade-free flap, the other reshapes the cornea beneath it. **Often considered** for a wide prescription range: short-sight, long-sight and astigmatism.	**$7,800** **both eyes** Includes surgeon and laser suite fees
PRESBYOND® ZEISS MEL 90 Laser Blended Vision	One eye is set for distance, the other for near, and your brain blends the two. Designed to reduce reliance on reading glasses. **Often considered** from the mid-40s to around 60, for reading vision.	**$8,800** **both eyes** Includes surgeon and laser suite fees
ICL Implantable Contact Lens	A tiny lens placed inside the eye, in front of your own lens. Nothing is removed, and it can usually be taken out later if needed. **Often considered** when laser is not suitable, including higher prescriptions and thinner corneas.	**$13,000** to **$14,000** **both eyes** Includes surgeon, lens, anaesthetic and hospital fees We will confirm your total price when you book.
RLE Refractive Lens Exchange	Your eye's natural lens is replaced with a premium artificial lens chosen for your measurements and goals, using the same established approach as modern cataract surgery. **Often considered** later, for reading vision and long or short-sight. Lens health matters more than age.	Approximately **$13,000** **both eyes** Includes surgeon, lens, anaesthetic and hospital fees We will confirm your total price when you book.

What every price covers

Every price is for both eyes and covers your assessments, the procedure and 12 months of aftercare.

How your procedure is chosen

At your in-person assessment, our qualified laser vision optometrist runs extensive diagnostic eye tests. Those tests decide which procedure suits your eyes.

03 Why EyeHub

Queensland's first
The ZEISS VisuMax 800 and MEL 90 laser suite. The latest and fastest ZEISS technology, available at your doorstep on the Sunshine Coast.

Every option under one roof
SMILE PRO®, LASIK, PRESBYOND®, ICL and lens exchange, so you get the procedure that fits your eyes, not the one a clinic happens to offer.

Your surgeon, by name
Dr Sonia Moorthy, refractive surgeon with Australian and global training. You will know who is treating you.

12 months of aftercare
Pre and post-op assessments and a full year of aftercare, in every price.

One price, both eyes
Each procedure has one both-eyes price in this guide. We will confirm your total price when you book.

Finance options
Available through third-party providers, subject to approval. Terms and conditions apply.

04 Meet your surgeon

CONSULTANT OPHTHALMOLOGIST

Dr Sonia Moorthy

Dr Moorthy is a consultant ophthalmologist and the founder of EyeHub, which she opened on the Sunshine Coast in 2022.

She studied medicine in Scotland and trained at Sydney Eye Hospital, then completed fellowships in Singapore and London and further training in laser vision surgery in Spain, India and the UK.

She is a RANZCO examiner and committee member, and her clinic is home to Queensland's first ZEISS VisuMax 800 and MEL 90 laser suite.

05 Paying for it

Deposits and balance

Online video assessment	**Free**
In-person assessment Comes off your laser surgery fee	**$100 deposit**
Surgery date	**$2,000 deposit**
Balance	**Due one week before surgery**

Finance options

Available through third-party providers, subject to approval. Terms and conditions apply. EyeHub does not provide the finance itself.

PROVIDERS
MediPay, Afterpay, Zip, Latitude

Medicare and health funds

There is no Medicare rebate, and some health fund extras may contribute.

06 Questions people ask

What are the risks?

Like any surgery, laser and lens procedures carry risks. For laser these include dry eye, glare or halos at night, infection, delayed healing and under or over-correction. Dr Moorthy goes through your personal risk profile at your pre-surgery consultation, and nothing goes ahead until every question you have is answered.

How long is recovery?

It varies by procedure and by person. Many people return to desk work within days, subject to Dr Moorthy's advice, and vision keeps settling over three to six months. Water and contact sports need a longer break, which we spell out for your procedure. Your 12 months of aftercare is included.

Does it hurt?

Anaesthetic drops numb the eye, so most people describe pressure rather than pain, and the laser step is over in minutes. Some grittiness, watering or light sensitivity for a day or two afterwards is common. We explain exactly how it is managed for your procedure.

What if I am not suitable?

Then we tell you, plainly, and why. Sometimes a different procedure suits, such as ICL or Refractive Lens Exchange; sometimes the honest answer is that glasses or contacts remain the right choice for now. Either way, you have spent 15 minutes, not a deposit.

What is the difference between SMILE PRO® and LASIK?

Both reshape the cornea with a laser. LASIK creates a thin flap first and reshapes the cornea underneath it. SMILE PRO® works through a keyhole incision a few millimetres wide, with no flap, which is why it is often considered by people who surf, swim or play contact sport.

Is my prescription too strong?

Modern ZEISS lasers treat a broader range than older technology, and if laser is not right for you, ICL is designed for higher prescriptions and thinner corneas. That is exactly what the assessment checks.

Something we have not covered? Ask on your free video call, or phone 07 5220 8990.

07 Where to find us

IN-PERSON ASSESSMENTS

Dr Moorthy also consults at 197 Weyba Road, Noosaville. In-person laser assessments are at Buderim.

Laser vision correction and lens procedures are designed to reduce your dependence on glasses or contact lenses. They are not suitable for everyone, and results vary from person to person. Risks include dry eye, glare or halos, infection, delayed healing and under or over-correction, and Dr Moorthy discusses these with you before anything goes ahead.

The free online suitability assessment is a 15-minute video call with the EyeHub team for adults 18 and over. It is a preliminary screening only, not a diagnosis or medical advice, and does not replace an in-clinic consultation with full diagnostic scans.

Prices are in Australian dollars, correct at the time of publication. No Medicare rebate applies. "Queensland's first" statements were correct as at October 2026 and are reviewed quarterly.

Dr Sonia Moorthy, consultant ophthalmologist, registered with the Medical Board of Australia. Member of RANZCO (Royal Australian and New Zealand College of Ophthalmologists), AUSCRS, ESCRS, AAO and ISRS.
